About This Game

Independent game developers have gone missing and your only lead on their whereabouts is a distress signal from a remote alien base. It's up to you to infiltrate this hostile labyrinth and uncover the answers you need to rescue them. Explore five diverse biomes while surviving dangerous hazards and obstacles, solving clever puzzles, and taking down ruthless and relentless enemies. The lives of these indies, and the future of independent games, depends on it.

Immerse yourself in this nostalgic, colorful, and quirky handcrafted FPS as you uncover the secrets and lore of a retro world that blurs the line between game and reality. In the process, enter the storied and autobiographical psyche of an independent game developer facing their inner demons while battling the challenges of making games for the love of the medium.

Inspired by the NES cult hit *The Guardian Legend* and other classic titles, *The Indie Game Legend 3D* provides a fresh lens to what a classic 8-bit game might look like through the eyes of the player character.

Your mission, critical to the future of indie games, will become *The Indie Game Legend*.

A nice character pack, with chill characters. Another good game for people with good taste. If you don't own a PS Vita and can't enjoy the glory of Jeff Minter's TxK, then this is as close as you'll get on PC. It's a great time.. i like the fact that the sniper is more stable and feels different but i had high hopes in the raptor , but the raptor is as good as any other guns so , saying that i hope you guys actually improve on the gun becuase it cost alot of money .. Extremely stupid and boring game.. False advertising this game isn't serious at all tho dude is called sam. Very good game. This game was only 1 dollar when buy, but would spend the full 5 if knew such good game. Very chill music, very chill game. Love ambience very much. Story very good. Love story. If like story, and like puzzle, and like chill, get game. Yeas.. Lot of stuff not working -- cannot figure out how to use the main menu with just the mouse and keyboard, then the controller interface has a number of issues, too. Cannot successfully remap keys to anything usable, and testing out each new configuration means sitting through a long intro animation. Unplayable on Ubuntu Linux 18.10 and 19.04 with xbox-type gamepad controller.

(Update 05/2019: Tried to use Steam Big Picture to get controller support. No dice.)

Arcade flying at its best. Great fun for just a few pound.. It's a cool game, but it gets boring very fast. My favorite Putt-Putt game. It's one of those games, where you get the feeling that the developers, came up with the title, and with it had all these great ideas of how to make a Putt-Putt game centered around time traveling. The environments are all unique and diverse as they should be. Traveling between time periods makes for fun puzzle solving experience. The randomized puzzles add a lot of replay value to the game. The music is simply fantastic. The characters are memorable. Solid Humongous Entertainment game. You should play it now.. **8V10**

"Pure pixel blood katana action."

Akane is a top-down high score hack'n'slash, on one small map. Everything in this game has so much potential, so PLZ make e.g. another RUINER out of this!!!

Pros:

- + [great setting](#)
- + [great art\pixel style](#)
- + [very good controls](#)
- + [good sound\music](#)
- + [good gameplay](#)
- + [little \(small\) gem](#)
- + [fair price tag](#)

Cons:

- [only one map](#)
- [corpses & blood vanish](#)

Verdict:

Kill kill kill, die, repaet.. Wtf did I just played. This is a better game than Stronghold 3... Really though if you need graphics you won't like this one, but its an easy management game that can be made more difficult with some of the options. If you played it as a kid, buy it.. AVOID. Only one situation that lasts less than two minutes. The pictures are all grainy and horrible. Animations are bad. Not worth your money.
